Linkedin: https://www.linkedin.com/in/durand18/
Github: https://github.com/Alfacoy

Knowledge

- App development in **React** with **NextJs**, consuming own and third party **API REST**.
- Creation and maintenance of **NodeJS** Servers with **Express**.
- Data persistence in **MongoDB** with **Mongoose**.

Interests

- I would like to learn more about Apex and Visualforce in the near future to improve my skills as a Salesforce Developer.

Professional Experience

Integrity Seguros

Analist Programmer Jr. (Oct 2020 - Currently)

I administrate the Salesforce platform, giving support and making new features for different areas. Among them the creation of surveys, automated mail delivery, workflows, approvals, reports, flows, standard panels and in Analytic Studio, etc.

I am also responsible for the running and maintenance of the company's bots, which were programmed in Automation Anywhere version 11.
